

DSC180-A05: Responsible AI | Write-up #2

For your Q1 Project, you will work with Medical Expenditure Panel Survey (MEPS) data.

To learn more about the MEPS data, please read the [Data Background](#) page on their website.

MEPS data is made available to researchers and policy analysts in both the public and private sectors. To see some of the topics that researchers publish on, read the [Topics](#) page.

Prompt: Return to the Medical Expenditure Panel Survey (MEPS) data background and topics. This time focus on [Medical Expenditure](#) topic.

After reading through 2-3 of the statistical briefs (please cite which ones), summarize the potential impacts (benefits, risks, limitations, etc.) of AI/ML tools that could be created from the MEPS data from the perspective of as many different stakeholders as you can think of. Point out where the interests of different stakeholders may be aligned and where they may be at odds.

Your answer should be at least 500 words (approx. one single-spaced page).
